Jakarta Pusat, DKI Jakarta, 10450

Security Engineer experienced in Detection Engineering, SIEM/XDR, Vulnerability Management, and Infrastructure Security. Skilled in threat detection, security monitoring, and risk mitigation, with a focus on strengthening security posture and continuous improvement.

EXPERIENCES

PT. Visionet Data Internasional — **Tangerang Regency, Banten**

Security Engineer — **Oct 2025 - Oct 2026**

- - Developed custom Auditbeat decoders for Linux and Windows logs to improve SIEM log normalization, analytics, and alerting.
- - Conducted vulnerability assessments using Tenable One and Picus Security to identify risks, validate security controls, and support remediation.
- - Implemented Wazuh multi-cluster monitoring for 200+ endpoints, including agent configuration, ruleset tuning, and log validation.
- - Integrated OpenCTI and Shuffle SOAR with Wazuh using 5+ connectors to automate threat intelligence and security workflows.
- - Optimized Auditbeat-Wazuh integrations through troubleshooting, log analysis, and security event validation.

PT. Inixindo Amiete Mandiri — **Bandung, West Java**

Junior Network Instructor — **Jun 2025 - Sep 2025**

- Assisted senior instructors in delivering basic networking training, including TCP/IP, OSI Layer, subnetting, routing, switching, and troubleshooting
- Supported hands on lab sessions using Cisco Packet Tracer and basic network simulation tools.
- Helped prepare training materials, lab exercises, and technical documentation for networking classes.
- Guided client during practical configuration tasks and answered basic technical questions.
- Assisted in evaluating participant progress and improving learning outcomes during the 3 month probation period.

PT. Pupuk Kalimantan Timur — **Bontang, East Kalimantan**

IT Infrastructure Intern - Magenta Pupuk Kaltim Apprentice Challenge Batch X — **Agu 2024 - Feb 2025**

- Developed and monitored dashboards to improve network visibility and threat detection in support of ISO 27001 and NIST aligned requirements.
- Built network traffic monitoring dashboards using NetFlow and the Elastic Stack to support network quality analysis and IT audit standards.
- Supported server resource monitoring and technical documentation to improve operational visibility and data driven IT activities.

EDUCATIONS

Universitas Merdeka Malang — **Malang, East Java**

Bachelor of Information Systems | GPA: 3.85/4.00 — **Sep 2020 - Feb 2024**

- Awarded Second Best Graduate in the Faculty of Information Technology.
- Participated in a community service project to support the digitalization of local businesses in Djamoesoedirjo, with responsibilities including landing page deployment, public hosting and DNS setup, and protection of digital assets through copyright registration.
- Specialized in IT Infrastructure: Network Administration, Server Management, Information Security, and Virtualization Technology.

SKILLS

- Network Security: Palo Alto, Fortinet, Cisco Packet Tracer
- SIEM Monitoring : Wazuh, Elastic Security, Google SecOps, Microsoft Sentinel
- Static Application Security Testing: Fortify
- Vulnerability & Security Validation: Tenable One, Picus Security
- Operating Systems : Windows, Linux
- Scripting and Query : Bash, SQL, PowerShell
- Infrastructure & DevOps: Git, Docker, VMware, Ansible

CERTIFICATIONS

- Certified Cybersecurity Educator Professional (CCEP) by Red Team Leaders
- Certified Network Security Fundamentals (CNSF) by Red Team Leaders
- Continuous Security Validation Purple Academy by Picus Security
- Cyber Security Bootcamp by PT Visionet Data Internasional
- Cyber Security Courses Online Complete Bundle by ITBOX
- SOC Level 1 by TryHackMe
- SOC Level 2 by TryHackMe
- Security Engineer by TryHackMe
